PROJECTS

- Deepflix - AI Powered Script-Based Movie & OTT Recommendation System**
Developed an AI-driven OTT recommendation system that analyzes complete movie scripts instead of relying only on genre metadata. Implemented NLP, Transformer models, and CNN-based semantic embedding generation to understand plot structure, emotions, and themes. Achieved improved personalization with cosine similarity matching and reduced cold-start problem compared to traditional collaborative filtering systems.
- Personal Portfolio Web Application**
Designed and developed a responsive personal portfolio web application to showcase my projects, skills, and technical expertise. The application features a modern UI, smooth navigation, and live deployment on Vercel, demonstrating my frontend development and deployment skills.

INTERSHIPS AND WORK EXPERIENCE

- Data Analytics Intern - Aspire Primograd PVT, LTD** (June 2025 - July 2025)
Successfully completed a Data Analytics course and gained practical knowledge in data analysis, data visualization, and database querying. Worked on real-time datasets to understand how data is processed and converted into actionable insights.
